

Joaquin Federico Falcon

Business Analyst (BI) | Business Intelligence | Power BI | SQL

General Pacheco, Buenos Aires, Argentina | +54 11 5109-1590 | joacofalcon58@gmail.com | linkedin.com/in/falconjoaquin

PROFESSIONAL SUMMARY

Business Analyst with a background in healthcare and a specialization in Business Intelligence. Experience developing management and operational dashboards in Power BI, ETL processes with Power Query, data modeling, and SQL/MySQL query optimization. Profile focused on data integration, transformation, and visualization within the healthcare sector, with the ability to gather operational requirements, document analytical solutions, and quickly adopt new BI platforms. Knowledge of Python, agile methodologies, and artificial intelligence tools applied to data analysis.

TECHNICAL SKILLS

BI & Visualization: Power BI, DAX, Power Query (ETL), Looker Studio, management and operational dashboards, KPIs, Reporting

Databases: SQL, MySQL, advanced queries, stored procedures, relational modeling, OLAP

ETL & Data: Data extraction, transformation and loading, Power Query, integration of heterogeneous sources

Tools: Advanced Excel (pivot tables, macros, dashboards), Google Sheets, Python (basic), Git (basic), Microsoft 365 Copilot

AI & Automation: Anthropic Claude, generative AI applied to analysis, report automation

Healthcare Sector: Outpatient medical centers, clinical analysis laboratory, LIS systems, ISO quality management, SNVS, digital health, interoperability

WORK EXPERIENCE

Business Analyst | Business Intelligence (BI)

COBER Medicina Privada

January 2025 – September 2026 | Buenos Aires Province, Argentina

- Development and maintenance of management and operational dashboards in Power BI for medical centers and business units in the healthcare sector, oriented toward management control and decision-making.
- Design of ETL processes and data models using Power Query, SQL and Excel, integrating information from multiple systems and operational sources.
- Analysis of billing, production, collections, member rosters and authorizations, identifying deviations, improvement opportunities and data quality issues.
- Definition and tracking of business KPIs, including operational performance, billing, collectability, production and pricing.
- Analysis of agreements and fee schedules, using metrics such as production-weighted averages to assess economic impact and coverage mix.
- Automation and standardization of reporting processes, reducing manual tasks and improving traceability, consistency and maintainability of information.
- Requirements gathering with stakeholders, leaders and key users, translating operational and business needs into documented analytical solutions.

- Implementation of quality controls, validations and technical/functional documentation to ensure continuity and knowledge transfer.
- Use of generative AI and agentic tools for documentation, analysis, QA and optimization of Business Intelligence workflows.

Senior Laboratory Technician

ARGUS Diagnostico Medico

September 2022 – July 2024 | Ingeniero Maschwitz, Buenos Aires, Argentina

- Processed biological samples in the Clinical Chemistry, Serology, Urinalysis and Hematology sections.
- Managed monthly stock and supply ordering.
- Actively participated in the implementation of a Quality Management System for accreditation.

Administrative Receptionist

ARGUS Diagnostico Medico

December 2021 – September 2022 | Buenos Aires, Argentina

- Operated the laboratory's LIS system, managing patient records, insurance data and authorization of medical orders.
- Participated in the implementation of a Quality Management System for accreditation.

Professional Internship – Senior Laboratory Technician

Hospital General de Agudos Dr. Ignacio Pirovano

October 2019 – November 2021 | Buenos Aires, Argentina

- Rotations in Intensive Care, Urinalysis (Hospital de Ninos Ricardo Gutierrez) and Microbiology (Hospital Central de San Isidro).

Laboratory Technician – Professional Internship

Hospital Provincial Magdalena V. de Martinez

April 2016 – December 2016 | Buenos Aires, Argentina

- Assisted biochemists with analysis and validation for clinical diagnostics.

EDUCATION

Data Analytics Fundamentals

Guayerd & IBM | Aug 2024 – Nov 2024

Advanced Technical Degree in Clinical Analysis Laboratory

Instituto Superior de Tecnicaturas para la Salud – GCBA | 2019 – 2021

B.S. in Biochemistry (in progress)

Universidad Maimonides | Since Mar. 2023

Technician in Chemistry for Process Industry

Escuela de Educacion Tecnica N°1 El Talar | 2009 – 2016

CERTIFICATIONS & LICENSES

Business Intelligence & Data Visualization

Business Intelligence Analyst Course — 365 Careers (Dec. 2024)

Introduction to Business Intelligence and Data Mining — Udemy (Aug. 2024)

Microsoft Power BI – Power BI Desktop Course — IBM / Udemy (Nov. 2024)

Power Query – Master Data Transformation in Power BI — IBM / Udemy (Nov. 2024)

Excel and Power BI – Data Analysis and Visualization — IBM (Sept. 2024)

Learn Everything About Looker Studio — IBM (Sept. 2024)

PowerBI — Santander Open Academy (Nov. 2025)

Databases & ETL

Complete Database Course – SQL and MySQL — IBM / Udemy (Oct. 2024)

Complete Excel – From Beginner to Advanced — Udemy (Aug. 2024)

Pivot Tables, Dashboards, Macros and More with Google Sheets — Udemy (Aug. 2024)

Digital Health & Healthcare Management

Digital Transformation in Health — Pan American Health Organization (PAHO/WHO) (Mar. 2026)

Series I – Certifiable Webinars in Digital Health — Pan American Health Organization (PAHO/WHO) (Jun. 2025)

Health Innovation Days (JIS) — Hospital Italiano de Buenos Aires (Oct. 2025)

SNVS 2.0 Course – Epidemiological Surveillance — Pan American Health Organization (PAHO/WHO) (Jan. 2022)

Quality Management Applied to Clinical Analysis Laboratories — Instituto Universitario CEMIC (Aug. 2022)

Bacteriology — AATALAC (Jan. 2024)

Genetics for Non-Geneticists — Biogenomica (Jul. 2023)

GLP – Good Laboratory Practices — UTN FRRe (Jan. 2018)

Laboratory Sample Collection Technician — Eddis Educativa (Jan. 2019)

Artificial Intelligence & Emerging Technology

Claude 101 — Anthropic (Apr. 2026)

Claude Code 101 — Anthropic (Apr. 2026)

Introduction to Subagents — Anthropic (Apr. 2026)

Introduction to Claude Cowork — Anthropic (Apr. 2026)

Masterclass in Python, AI and Cybersecurity Applied to Industry — IngeLearn (Mar. 2023)

Explore Emerging Tech — IBM (Jul. 2024)

Microsoft 365 Copilot Interactive Experience for Executives — Microsoft Learning (Apr. 2025)

Methodologies & Management

Agile Explorer — IBM (Jul. 2024)
